

Environmental Policy

At Seplat Energy Plc, we recognize that our business has an important role to play in protecting and enhancing the environment for future generations and to ensure long-term sustainable operations within the energy industry. We are committed to understanding, managing, and reducing the environmental and ecological impacts of our activities through innovation, technology, and cultural change.

To this end, Seplat Plc shall conduct its operations in a sustainable manner, with due regard to the preservation of the environment and in compliance with applicable regulations and guidelines. We will:

- Comply with applicable local/international environmental laws, regulations, permits and industry best practice to ensure continued support from our host communities, investors, lenders and other stakeholders;
- Commit to an enhanced Environmental Management System, continuous assessment of our environmental performance, adoption of best practices, available technologies, and training;
- Identify sensitivities of operating environment, potential environmental impacts of our operations, set environmental objectives, and implement control measures to ensure improved environmental performance, resource conservation & biodiversity preservation;
- Develop Environmental Management Plans and monitor effectiveness of mitigating measures against potential impacts and review as necessary;
- Prevent or mitigate the environmental impact resulting from our operations including with regards to air quality, surface water, soil and groundwater and biodiversity;
- Have fit for purpose contingency plans that are continually tested to ensure readiness to respond to potential environmental emergencies;
- Continuously strive to achieve reductions in greenhouse gas (GHG) emissions from our operations through strategic planning, design, construction, and efficient asset integrity;
- Organize sensitization programs and trainings for members of staff and community stakeholders to build a sustained capacity on environmental protection and improvement;
- Conserve natural resources through the adoption of energy efficient processes and technologies, waste avoidance, recycling and re utilization; and
- Manage waste from operations and activities safely from cradle to grave in line with statutory requirements promoting the concept of 4Rs (Reduce, Re-use, Recycle & Residue) of waste management.

This Environmental Policy is reviewed periodically and available to all interested stakeholders.
